1. Project Overview

Original Project Title:

Digital Archival System for Publication and Knowledge Management Division of Bicol University

Original Authors/Source:

Capstone Project retrieved from the faculty room of Bicol University College of Science Building 2.

Madrona, L., Manalo, S. K., Medallon, L. J., & Daep, P.K. (2023). *Digital archival system for Publication and Knowledge Management Division of Bicol University* [Unpublished Undergraduate Thesis]. Department of Information Technology, Bicol University.

Module Scope:

The paper by Madrona et al. (2023) **Digital Archival System for Publication and Knowledge Management Division of Bicol University** is an undergraduate capstone project that aims to store, organize, and manage Major Final Output (MFO) documents for different colleges under Bicol University. And also to generate reports for the colleges that can be filtered by year, quarter, and document category. This is because the Bicol University Publication and Knowledge Management Division (BU PKMD) uses Google Drive for the collection, management, and preservation of MFO documents, and submission and organization of reports. Security is one of the main issues of the utilization of GDrive, since unauthorized access and modifications are likely to happen.

Rationale:

The paper proposed a system that aids BU PKMD in the efficiency and effectiveness of their paperwork. There are 3 types of users in the system, which have different access levels: Administrator, Research coordinator, and Personnel. And with this, the researchers believe that this centralized digital archival system will facilitate a better workflow, which solves the existing problems and improves the management and security of the documents.

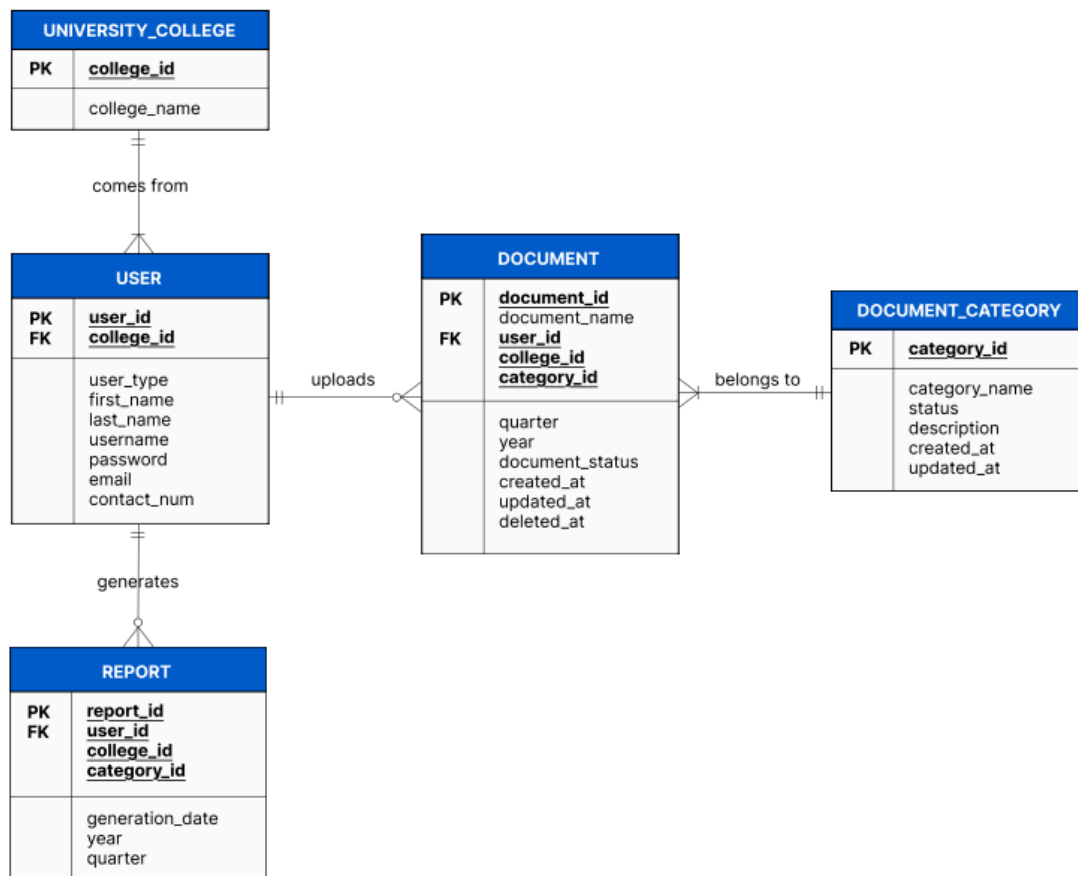

The original implementation utilized PHP, MySQL, XAMPP, HTML, CSS, JavaScript, Chart.js, and Bootstrap 5. PHP for the server-side scripting language paired with HTML, CSS,

and Bootstrap 5 for the frontend. Meanwhile, our implementation uses React to replace PHP and Tailwind CSS to style the frontend. Furthermore, Node.js/Express was used for the backend.

2. Technology Stack

- Frontend Framework: **React** is used for the frontend framework. This JavaScript library allows the website's UI to be dynamic and interactive.
- Styling: **Tailwind CSS** is used for the styling. This utility-first CSS framework is responsible for making the style responsive and consistent directly in the markup.
- Backend Framework: **Node.js/Express** is used for the backend framework. Node.js provides a runtime environment that runs JavaScript on a server, while Express.js is a simple framework that makes managing server-side logic easier.
- Database: **MySQL 8.0** is utilized for the database. This relational database management system (RDBMS) handles the storage of all the data and metadata related to the web application for the original project.

3. Database Design

Relationship	Type	Description
USER → DOCUMENT	One to Many	A user can upload multiple documents to the system.
DOCUMENT → USER	Many to One	Many documents can belong to one user.
USER → UNIVERSITY_COLLEGE	One to One	A user must belong to one college under the university.
UNIVERSITY_COLLEGE → USER	One to Many	A college under the university can have multiple users
DOCUMENT → DOCUMENT_CATEGORY	One to Many	Each document can only belong to one category
DOCUMENT_CATEGORY → DOCUMENT	Many to One	A document category may store many documents.
USER → REPORT	One to Many	A user may generate multiple reports about the document/s
REPORT → USER	Many to One	Multiple reports can be generated by a user.

UNIVERSITY_COLLEGE

Attribute	Data Type	Constraint	Description
<u>college_id</u>	INT	PK, AUTO_INCREMENT	ID of college department
college_name	VARCHAR(100)	NOT NULL	Name of college department

USER

Attribute	Data Type	Constraint	Description
<u>user_id</u>	INT	PK, AUTO_INCREMENT	ID of user
college_id	INT	FK	ID of college department
user_type	ENUM('Administrator', 'Research Coordinator', 'Personnel')	NOT NULL	Roles: Administrator, Research coordinator, or Personnel
first_name	VARCHAR(255)	NOT NULL	First name of user
last_name	VARCHAR(255)	NOT NULL	Last name of user
username	VARCHAR(100)	NOT NULL	Username of user
password	VARCHAR(255)	NOT NULL	Password of user
email	VARCHAR(255)	UNIQUE	User's email address
contact_num	VARCHAR(20)	NOT NULL	User's contact number

DOCUMENT_CATEGORY

Attribute	Data Type	Constraint	Description
<u>category_id</u>	INT	PK, AUTO_INCREMENT	ID of the Category
category_name	VARCHAR(100)	NOT NULL	Name of the Category
status	VARCHAR(50)	NOT NULL	Category Status
description	TEXT	NOT NULL	Brief detail of the category
created_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Creation date
updated_at	TIMESTAMP	TIMESTAMP DEFAULT CURRENT_TIMESTAMP ON UPDATE CURRENT_TIMESTAMP	Modification date

DOCUMENT

Attribute	Data Type	Constraint	Description
<u>document_id</u>	INT	PK, AUTO_INCREMENT	ID of Document
document_name	VARCHAR(255)		Filename of Document
user_id	INT	FK	ID of user
college_id	INT	FK	ID of college department
category_id	INT	FK	ID of Document Category
quarter	ENUM('1st Quarter', '2nd Quarter', '3rd Quarter', '4th Quarter')	NOT NULL	Document quarter
year	YEAR	NOT NULL	Document year
document_status	VARCHAR(50)	NOT NULL	Status of document
created_at	TIMESTAMP	DEFAULT CURRENT_TIMESTAMP	Upload timestamp
updated_at	TIMESTAMP	TIMESTAMP DEFAULT CURRENT_TIMESTAMP ON UPDATE CURRENT_TIMESTAMP	Modification timestamp
deleted_at	TIMESTAMP	TIMESTAMP NULL DEFAULT NULL	Deletion timestamp

REPORT

Attribute	Data Type	Constraint	Description
<u>report_id</u>	INT	PK, AUTO_INCREMENT	ID of report
user_id	INT	FK	ID of user
college_id	INT	FK	ID of college department
category_id	INT	FK	ID of Document Category
generation_date	TIMESTAMP	TIMESTAMP DEFAULT CURRENT_TIMESTAMP	Date of report
year	YEAR	NOT NULL	Year covered of report
quarter	ENUM('1st Quarter', '2nd Quarter', '3rd Quarter', '4th Quarter')	NOT NULL	Quarter covered of report

4. Module Features

Describe each CRUD operation with examples:

Create

This operation allows the uploading of Major Final Output (MFO) documents in PDF, DOC, or DOCX format with a maximum file size of 20MB.

Form Validation Rules:

- Document file can be dragged and dropped or browsed, and the given formats should be either in PDF, DOC, or DOCX with a maximum size of 20MB; files exceeding this size will be rejected.
- Document title is required, and an example placeholder text is given to avoid errors.
- Document Category is required, and a dropdown list is given with the four options: Thesis, Capstone, Research Paper, and Feasibility Study.

Error Handling:

- If any required field is left blank, a prohibited cursor will appear when hovering on the submit button, and it will not work.

Read

This operation fetches and displays the documents in the dashboard with the search by title or ID feature.

Search and Filter Features:

- Users can search documents by title or document ID using the search bar at the top of the table; results update dynamically as the user types

Update

This operation allows the Administrator user type to edit the metadata, such as the category or date of the uploaded document.

Status Update:

- The Administrator can update the status of the document, with 3 dropdown options: Approve, Reject, or Delete.

Delete

- This operation allows the deletion of the uploaded MFO document, with the confirmation feature before executing the deletion from the database.
